

Summer Mix 6% Phosphorus

Feeding Guide

Summer Mix 6% P is a protein/mineral based mid-season supplement suitable for feeding to breeder cattle and sheep in phosphorus deficient country when the grass starts to hay off and for increasing growth rates of young cattle on good quality feed. This mix will supply a low level of protein and high mineral levels when the feed quality is at its peak and before higher intakes of urea are required after the first frost.

Daily intakes 100-150 grams per day for weaners/growing cattle. 150-200 grams per day for breeders/heifers. 20-30 grams per day for sheep.

Summer Mix 6% Phosphorus	
Dry Matter	98.1%
Total Crude Protein	31.1%
Crude Protein	11.6%
Equivalent Crude Protein	19.4%
Urea Equivalent	6.8%
Urea	5.0%
Nitrogen	3.1%
Salt	15.0%
Sulphur	4.1%
N:S Ratio	0.77 :1
Calcium	9.9%
Phosphorus	6.0%
Ca:P Ratio	1.67 :1
Rumensin (kg/tonne)	4.00
