

Feeding Guide

- Commence feeding rate at 150-250grams / head /day
- Locate lick away from watering points to avoid over-consumption and to encourage stock to graze out
- Where indicated these blocks contain Urea and may be toxic if taken in excess. Feed with adequate dry roughage. Do not feed to starving stock or any animals other than sheep or cattle
- It is recommended that sheep do not have access to lick with Urea higher than 10% and especially where cravings have been shown

Features Include

- ✓ Suitable for cattle and sheep grazing in traditional mulga country
- ✓ Protein levels that compliment mulga browse
- ✓ Elevated phosphorus levels in these typically deficient areas
- ✓ Trace minerals and vitamins including A, D & E as standard
- ✓ \$20 per tonne to add Monensin
