

# Sheep Blocks

## Feeding Guide

- Commence feeding rate at 10-15grams / head /day
- Allow free access to stock
- Locate the blocks away from watering points to avoid over-consumption and to encourage stock to graze out
- Where indicated these blocks contain Urea and may be toxic if taken in excess. Feed with adequate dry roughage.
- Do Not feed to starving stock or any animals other than sheep or cattle
- It is recommended that sheep do not have access to blocks with Urea higher than 10%

## Features Include

- ✓ More suitable for absentee managers
- ✓ The blocks can handle inclement weather therefore not requiring full covered feed troughs
- ✓ Consumption rates are normally lower than on loose lick which can be of benefit if sheep are in a traditionally high consumption area

	5% Block	5% Block + Phosphorus
Salt	32.0%	30.0%
Urea	5.0%	5.0%
Crude Protein	3.7%	3.7%
Equivalent Crude Protein	14.5%	14.5%
Total Protein	18.2%	18.2%
Phosphorus	1.3%	3.5%
Calcium	3.6%	3.6%
Sulphur	1.0%	1.0%
